>> History Imprint -Milestones

Aluminco started almost 40 years ago as a family business and has now a global footprint. Founded in 1982 Aluminco is committed in the research development and production of innovated, high quality aluminium products.

Aluminco started as a pioneer in the products of cast aluminium of classic designs for every architectural application. Nowadays, is one of the leading Greek Aluminium companies and exports in more than 60 countries worldwide.

Every great story has a beginning.

Theodore Karras, a young pioneer entrepreneur, founds the company in Athens. In a small foundry with limited sources and extraordinary passion, he produces a wide range of cast aluminium products.

1984-1989

The EARLY years

1984 The first production facility.

1986 Aluminco extends its range of products by producing cast aluminum lightings for public and commercial spaces.

1989 Launching the first aluminium door panels in the Greek market.

1990-1999

The **GROWTH** years

The company becomes increasingly international, extending its product portfolio and its exports sales network.

2000-The E2 2002 Pri sq. m. in

2000-2009

The EXPANSION years

2002 Privately owned new premises of 60.000 sq. m. include state of the art production facilities, logistic center and administration offices.

2003 In reply to the increasing demands of energy-saving and thermal insulation, Aluminco develops the first thermal break profile series for aluminium windows and doors.

2006 Multimillion investment plan in infrastructures, machinery, distribution systems and computerization.

2010-TODAY

The NEW era

2011 Going Green Culture.

Installation of photovoltaic mounting system of 1,2 MWp on industrial property with an annual production of 1,750,400 KWh of electricity, and savings over 1,700 tons of carbon dioxide (CO2) annually.

2015 New industrial production units.

Operation of the new production line for architectural and industrial profiles, the new vertical powder coating line and the new robotics storage unit. NextGen of Management takes over.

2017 Multi-level investment plan in new R&D labs and on-line B2B ordering platforms. Export activities exceed the 50% of its annual turnover. Launching new generation of architectural aluminium systems, optimized in terms of design, security and energy efficiency.

2018 Strong operational and financial improvements.

Double-digit increases in performance, achieving record group sales of 27% more than in the prior year. 54% of Aluminco's group sales was generated from international sales.

2019 Strengthening our entire portfolio to stimulate further growth.Group sales scored high, exceeded € 40 mil., reflecting single-digit growth at the Aluminco brand.All major market segments recorded sales increases.

2020 Despite all the challenges, we used 2020 to make Aluminco a better company.Our business recovered quickly after having hit in the second quarter and returned to growth in the fourth quarter.We expanded our digital capabilities and reach. We continued to invest in sustainability and our people.

To become a premium, worldwide Aluminium supplier of superior systems that meet evolution, through on-going research and industrial processes technology optimization.

Vision

Values

Innovation Honesty & Trust Responsibility Customer Orientation

Targeting the international community of architects, designers, engineers, construction perfectionists and fabricators, we offer a complete product portfolio of innovative, energy efficient architectural aluminium solutions, embodying top quality, high functionality and contemporary design standards.

>> We are global.

GLOBAL REACH / INTERNATIONAL FOOTPRINT

0

Ο

ALUMINCO's distribution network serves the most important markets in EMEIA and the Americas, launching aluminum products in more than 60 countries worldwide.

Nowadays, exports reach the 55% of the company's annual turnover, with an upward trend.

Awards Recognitions

The awards and international distinctions reflect our excellence in design, innovation and technology!

SUPERBRANDS 2021 Awarded in Superbrands Greece 2021-2022 ALUMINIUM IN ARCHITECTURE AWARDS 2021, Gold Prize for facade system SKG120 MANUFACTURING EXCELLENCE AWARDS 2019 Innovative Products GREEK EXPORTS AWARDS 2017 Top Industrial Export Company BATIMAT INNOVATION AWARDS 2017 Most Innovative Product

Research & Development are essential within our business!

Our evolution and progress are an achievement coming from the inspiration of a group of people, the "heart beat" of ALUMINCO, on whose inspiration and concept, we base our next steps and development.

As part of the development process, all product series are certified by notable International Institutions such as UK Laboratory Intertek, the US UL CLEB Test Laboratory, and the accredited German IFT ROSENHEIM Institute, for their outstanding characteristics and performances.

A strong portfolio of brands

HINGED WINDOW & DOOR SYSTEMS SLIDING WINDOW & DOOR SYSTEMS BI-FOLDING DOOR SYSTEMS ENTRANCE DOORS CURTAIN WALL & FAÇADE SYSTEMS SHADING SYSTEMS RAILING SYSTEMS OUTDOOR LIVING SYSTEMS

EISSODOSSUITE

Hinged Window & Door Systems

Five systems offer hundreds of configurations, with inward or outward openings, combining outstanding performance with adaptation properties and exceptional design.

W/ E

Sliding Window & Door Systems

Top performing sliding systems with innovative and unique features, shaping elegant constructions and fulfilling large-scale requirements.

Bi-Folding Door Systems

From new construction to remodeling, BI-Folding Door Systems combine ease of operation, aesthetics and optimal thermal performance.

Entrance Doors

Combining innovative technologies with exceptional design, Entrance Doors constitute the perfect entry into a home or commercial property.

D75 ENTRANCE DOOR INSULATED SYSTEM

D90 ENTRANCE DOOR INSULATED SYSTEM

D110 INNOVATIVE HIGH-PERFORMANCE PIVOT DOOR SYSTEM

Curtain Wall & Façade System

Curtain Wall and Façade systems well equipped to meet the construction's requirements enhancing the building's exterior.

EW50 CURTAIN WALL SYSTEM EW50 SP CURTAIN WALL SYSTEM WITH OUTSTANDING SOUND PERFORMANCE

Shading Systems

Effective solar shading systems offering high-quality solutions and a wide range of design and function options.

Railing Systems

Numerous, cutting-edge series able to adapt and deliver the perfect solution for every possible interior or exterior space, from private residences to commercial properties.

CRYSTAL LINE SERIES - GLASS SUPPORTING SYSTEM

FUSION LINE SERIES -ADVANCED RAILING SYSTEM

CLASSIC LINE SERIES -AUTHENTIC CAST LINES F50 SERIES -BALUSTRADE SYSTEM IN ANODIZED LINE

Outdoor Living Systems

Meet the highest demands of the contemporary architectural trends in modern living outdoor spaces.

Architectural Design Meshes

Welcome a new world of possibilities!

Architectural Design Meshes offer real benefits and uncompromised features. Façades, balustrades, gates, fences, sunscreens, ceilings, special constructions, are all up to your imagination and... Aluminco Architectural Design Meshes!

High-level industrial capacity & logistics services across one production site!

We control the whole process from extrusion to distribution providing confidence to our business partners through a secure and efficient supply chain.

We are capable of almost everything

We place great emphasis on the improvement and expansion of our production capacity. Aluminco's facilities include:

Distribution Facilities

Multiple

Customer satisfaction and quality assurance are paramount!

We constantly strive to improve each aspect of the production process and the supply chain to ensure premium quality to our business partners.

Advanced Testing Center

As part of the development process, our products undergo numerous tests that allow them to meet the most stringent international standards and even regularly exceed them.

We use this expertise to test the performance level of our systems in our own in-house labs and support our partners with project-specific testing.

The ALUMINCO Testing Center is accredited and certified by the German Testing Institute ift Rosenheim, providing reliable and secure results, based on globally recognised standards.

The extra mile for our Business Partners!

Innovation is at the heart of everything we do.

We offer pioneering products and solutions for newbuilds and renovations designed to meet specific user needs in different climate zones. Working with new trends and society challenges are hence the key issues for Aluminco in its corporate strategy and product development.

Energy Efficiency

Savings of energy costs due to efficient insulation

Comfort

Increased Comfort in terms of Thermal and Sound Insulation

Safety & Security

Enhanced system components deliver optimum Air-Water-Wind performance

Design

The greatest possible degree of natural light penetration

THEFT

Savings of energy costs due to efficient insulation.

FACT

Buildings consume around 40% of the energy generated. New buildings, from 2021, must be nearly zero-energy buildings.

CALL TO ACTION

Energy efficiency of buildings must be massively improved to have a very low energy balance. To achieve the high standards for nearly-zero energy buildings must first and foremost be well insulated.

APPROACH

W4900 Passive House Concept Our window system W4900 fulfil these strict certification criteria and have excellent thermal insulation to passive house level.

Increased Comfort in terms of Thermal & Sound Insulation

People from industrialised societies spend 90% of their lifetime in closed buildings. Building envelopes influence the working and living environment.

CALL TO ACTION

Promote and safeguard people's health and wellbeing.

APPROACH

In terms of insulation values, Aluminco new generation systems score points for their outstanding performance and properties. Our brand-new systems, Curtain Wall EW 50 SP, Sliding SL2450, Entrance Door D75 offer increased insulation values, thermal insulation from 1.0 $W/(m^2K)$ and sound insulation up to 52 dB.

Enhanced system components deliver optimum Air-Water-Wind performance

FACT

Extreme weather conditions due to climate change.

CALL TO ACTION

Redesign our buildings to cope with climate change.

APPROACH

The system W4750 is ALUMINCO's proposal for advanced insulating casements, which meet the high standards of all advanced markets, with first in class performance in terms of thermal insulation, air-and water-tightness, and resistance to wind load. It is the ideal solution for projects that require high performance and maximum security.

The greatest possible degree of natural light penetration

FACT

The less visible aluminium frames to maximise the flow of natural light.

CALL TO ACTION

To meet the trend of "transparent" architecture.

APPROACH

Slim profiles, concealed fittings and high-quality look accessories are being used to deliver sliding doors and windows of unlimited freedom. New generation of ALUMINCO's high-end sliding systems are the ideal options for projects requiring wide spans, outstanding performance and maximum ease of use.

Our Motivation, Our Contribution!

SUSTAINABILITY

We are taking action on the greatest challenge of the 21st century: how to truly prosper within the natural limits of our planet. ALUMINCO contributes to tackling the climate challenge, by reducing the carbon footprint of its products and by allowing savings of energy costs due to efficient insulation.

Our commitment to Sustainability:

CO² footprint matters

We are reported as a Leading Brand with lower **CO**² footprint and more efficient recycling.

Passive House Concept

We launched the ALUMINCO W4900, a superior hinged system with certified thermal insulation $U_{\rm w}{=}0.78~W/m^2K$
