ALUMINCO Wins EcoVadis Gold Medal – Among the Top 5% Globally in Sustainability

ALUMINCO S.A., one of the leading Greek and internationally recognized companies in the aluminum industry, proudly announces the achievement of the **Gold Medal** from **EcoVadis**, the global sustainability rating agency. With a total score of **79%**, ALUMINCO ranks among the **top 5% of companies worldwide** for its performance in sustainability, social responsibility, and business ethics. Notably, ALUMINCO is the **only extrusion company in Greece** to have received the EcoVadis Gold Medal, a distinction that reinforces its unique position in the industry.

This significant achievement is no coincidence; it is the result of consistent investment, long-term strategy, and daily commitment as ALUMINCO moves steadily toward a more **sustainable future**. The EcoVadis rating confirms that the company **implements certified systems and sound policies across all aspects of its operations**, meeting the strictest international sustainability standards.

A Steady Investment in Sustainability

Sustainability lies at the core of ALUMINCO S.A.'s corporate strategy. The production of its innovative Skyline systems is now based on aluminum raw material that includes **up to 90% recycled content**, sourced from the Greek market. This pivotal transition significantly reduces the carbon footprint of its products.

In parallel, ALUMINCO has adopted the **Environmental Product Declaration (EPD)** system, transparently certifying the environmental impact of its products throughout their life cycle. The company's EPD is based on a **Life Cycle Assessment (LCA)** study, aligned with **ISO 14025, EN 15804, ISO 14040, and ISO 14044** standards, covering its core product lines that represent the majority of its production and sales.

Green Energy and Circular Economy in Action

ALUMINCO's commitment to environmental responsibility is reflected in its day-to-day operations:

- > **50% of its production is powered by photovoltaic energy**
- > **Airborne pollutant recycling** is applied in aluminum production
- > **Raw materials and packaging are recycled**
- > The company is committed to **technologies that lower CO₂ emissions per ton of produced aluminum**

Aluminum, as a **100% recyclable material**, is at the heart of the company's green philosophy, offering solutions that meaningfully contribute to reducing the overconsumption of natural resources.

**A planet
to love**

ESG Culture – A Deeply Rooted Commitment

ALUMINCO embraces a mature **ESG (Environmental – Social – Governance)** culture, fully integrated into all its operations and processes. This culture is reflected in:

- > Systematic environmental care
- > Fair and responsible treatment of its people
- > Transparent and ethical governance

This philosophy shapes the company's identity and guides every business decision.

The EcoVadis Gold is ALUMINCO's Green Future

This prestigious recognition confirms ALUMINCO S.A.'s strategic path toward a business model that promotes **sustainable development, innovation, and responsibility** toward both the environment and society. The company continues to actively invest in green solutions, building a future with a positive impact.

“The EcoVadis Gold Medal is a milestone that inspires us to move forward with even greater determination. The assessment was based on international standards such as the **UN's 10 Principles of the Global Compact** and **GRI indicators**, confirming our strategic alignment with the **Sustainable Development Goals (SDGs)**. ALUMINCO rightfully belongs in the **Top 3% globally** in the areas of **Environment, Strategy, and Governance.**”

— **Eleni Marathoniti**, Quality & Excellence Manager, ALUMINCO
